

MUHAMMAD SHAWAIZ

+92-343-3326500 | shawaizbutt555@gmail.com | github.com/Shawaiz555 | Gujrat, Pakistan

EDUCATION

PMAS Arid Agricultural University

Bachelor of Science in Computer Science; GPA: 3.75/4.0

Expected Graduation: 2026

Gujrat, Pakistan

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C#, PHP, HTML5, CSS3, SQL

Frameworks and Libraries: React, Next.js, Node.js, Express.js, Redux, Tailwind CSS, Bootstrap

Databases: MongoDB, PostgreSQL, MySQL, SQL Server

Tools and Platforms: Git, GitHub, VS Code, Postman, Docker, Supabase, REST API, JWT

Core Competencies: Full Stack Development, MERN Stack, Responsive Design, API Development, Database Design, Agile, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Developer

Freelance

February 2025 – Present

Gujrat, Pakistan

- Developed 5+ production-grade web applications using MERN stack (MongoDB, Express.js, React, Node.js) serving 1000+ active users with 99.9 percent uptime
- Designed and implemented RESTful APIs with JWT authentication and role-based access control, reducing security vulnerabilities by 40 percent
- Optimized database queries and React component rendering, improving application response time by 35 percent and reducing load times by 50 percent
- Collaborated with cross-functional teams using Git version control and Agile methodologies to deliver projects ahead of schedule

Software Engineering Intern

Cyber Silo

August 2024 – October 2024

Remote

- Contributed to development of AI-driven applications by integrating OpenAI GPT models with React frontend using RESTful APIs
- Built 15+ reusable React components following industry best practices and design patterns, reducing code duplication by 30 percent
- Participated in code reviews and testing workflows, identifying and resolving 25+ bugs to improve application stability

PROJECTS

Culinary AI - Restaurant Management System | React, Node.js, Express.js, PostgreSQL, OpenAI

2024

- Engineered full stack restaurant management platform with GPT-4 powered conversational AI for order processing, menu browsing, and table reservations
- Developed RESTful API backend with Node.js and Express.js handling 500+ concurrent requests with real-time order tracking using Supabase
- Implemented responsive frontend with React and Tailwind CSS achieving 95+ Google Lighthouse performance score across all metrics
- Reduced order processing time by 45 percent through real-time analytics dashboard and automated workflow optimization

MS-EventSphere - Event Management Platform | React, Next.js, MongoDB, Express.js

2024

- Built scalable event management system with server-side rendering using Next.js and MongoDB Atlas supporting 200+ concurrent users
- Created admin dashboard for event moderation with CRUD operations and real-time user management capabilities
- Optimized MongoDB aggregation pipelines and implemented indexing strategies, reducing query execution time by 60 percent

Concert Booking Website | HTML, CSS, JavaScript, PHP, Bootstrap, MySQL

2023

- Developed responsive concert booking platform with secure user authentication and integrated payment processing system
- Implemented dynamic ticket booking functionality with real-time seat availability and automated email confirmations

CERTIFICATIONS AND ACHIEVEMENTS

Academic: Dean's List recognition for maintaining 3.75/4.0 GPA throughout undergraduate studies

Coursework: Data Structures and Algorithms, Database Systems, Web Development, Object-Oriented Programming, Software Engineering
